DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- Claims 1-10 and 15-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- Claims 1, 2, 4 and 5 recite the term "can be". Examiner not sure if the functions disclosed after the term "can be" are optional or required.
- Claims 5, 6, 7 and 15-17 recite the term "repeat time". Applicant needs to further clarify this term.
- Claims 7 and 17 recite the terms "repeat time or lapse time". Applicant needs to further clarify these terms.

Claim Rejections - 35 USC § 102

 The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- Claims 1-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Inaba et al (Pub. No.: US 2002/0015035).

Application/Control Number: 10/593,453

Art Unit: 3663

Regarding claim 1: Inaba et al discloses a control system for a motor vehicle with an output control for putting out an information item concerning the operation of motor vehicle and with a functional control, separated the generation or supply of information concerning the operation of motor vehicle, wherein the output control comprises an information memory for the storage of information concerning the operation of motor vehicle, whereby the information concerning the operation of motor vehicle can be read out of the information memory and can be put out by the output control (see at least fig. 1).

Regarding claim 2: Inaba et al discloses a control system according to claim 1, wherein the information concerning the operation of motor vehicle can be read out of the information memory and can be put out by the output control in case of a request to put out the information concerning the operation of motor vehicle (see at least paragraph 0037).

Regarding claim 3: Inaba et al discloses a control system according to claim 1, further comprising a communication link for transmitting the information concerning the operation of the motor vehicle from a functional control to the output control independent of a request to put out information concerning the operation of motor vehicle (see at least fig. 1).

Regarding claim 4: Inaba et al discloses a control system according to claim 3, wherein the information concerning the operation of motor vehicle can be transmitted from the functional control to the output control in case of a change concerning the operation of motor vehicle by functional control (see at least fig. 2).

Regarding claim 5: Inaba et al discloses a control system according to claim 3, wherein the information concerning the operation of motor vehicle can be transmitted from the functional control to the output control after expiration of a repeat time (see at least paragraph 0085).

Art Unit: 3663

Regarding claim 6: Inaba et al discloses a control system according to claim 5, wherein by means of output control, one can monitor whether, within the repeat time, the information concerning the operation of motor vehicle was transmitted from the functional control to output control (see at least paragraph 0049).

Regarding claim 7: Inaba et al discloses a control system according to claim 5, wherein the information concerning the operation of motor vehicle out of the information memory cannot be put out by output control when the information concerning the operation of motor vehicle was not transmitted within the repeat time or a time lapse from the functional control to output control, whereby the time lapse is longer than the repeat time (see paragraph 0086).

Regarding claim 8: Inaba et al discloses a control system according to claim 1, wherein the output control comprises a display for the optical illustration of the information concerning the operation of motor vehicle (see at least fig. 1).

Regarding claim 9: Inaba et al discloses a control system according to claim 1, wherein the output control comprises an input device for the purpose of putting in a request for putting out and/or for optical illustration of the information concerning the operation of motor vehicle (see fig. 1, al-an).

Regarding claim 1: Inaba et al discloses a Motor vehicle, comprising a control system according to claim 1 (see at least fig. 1).

Claims 11-17 are rejected using the same prior art and same rationales as claims 1-10.
